

Time Link Cargo takes delivery of Liquid Gold limited edition R580 Scania

We've all heard the expression, "everything he touches turns to gold," but in the case of Scania, the idiom is true to life. On the 8th April 2010 Scania SA handed over the first Liquid Gold limited edition R580 Scania to Time Link Cargo – and it's one of only twelve manufactured in the world.

Following the international success of the R-Series, Scania Southern Africa has launched the 2010 ITOY winner with a limited edition "Legend" series. At the local launch of the new R-Series, a glittering event held in early April at the Centre for Scientific and Industrial Research (CSIR) Convention Centre, three loyal Scania customers were presented with their first limited edition Scania R-Series trucks. Each "Legend" truck comes complete with liquid-gold and griffin-emblazoned body work, special edition nudge bar, headlights and badge, and the chrome exhaust which enhances the sound and power of Scania's V8 engine.
